Ripplex Inc.
April 25, Tokyo

Ripplex Releases “Ripplex Address Book Ver.1.1”

The unified internet address book synchronized with Twitter and Skype, finds friends, launches applications and auto updates friends' information.

Tokyo, Japan – April 25, 2008- Ripplex Inc. today introduced Ripplex Address Book, the release of free unified internet address book software on Windows and Macintosh. Ripplex Inc. also starts sales promotion activities for Ripplex Address Book Ver.1.1 in collaboration with Skype Technologies S.A and Twitter Inc.

Ripplex Address Book is a unified address book which supports chat, SNS, email, VoIP phone and other services. Ripplex users can find each other on internet without uploading any personal information on server and without disclosing any personal information to any third party. Ripplex Address Book enables closer communication among friends using various kinds of services in a unified manner.

Ripplex Address Book Ver.1.1 which was released today, automatically imports friends' information. These friends are linked each other outside various services. In Ripplex Address Book, Twitter messages, Skype's mood messages and Skype presence of friends are displayed in a unified manner on the main window.

“Ripplex Address Book Ver.1.1 will offer Skype users convenience and enable them to find new friends” said Shinichi Iwata, General Manager of Skype Japan Office. He continues “we welcome Ripplex to our global community of Skype partners with this tool offering Skype users a new communication opportunity around the world.”

We love to see interesting tools like the Ripplex Address Book built on Twitter's open API," said Evan Williams co-founder of Twitter, "I think this product will enable more people to know how fun and useful Twitter is."

Ripplex Address Book Ver.1.1 works on PC with Windows Vista, Windows XP and Mac with MacOS10.4 or later.

About Ripplex Inc.

Ripplex Inc. was founded in 2006 in Tokyo to provide with the infrastructure of internet communication over various kinds of services like chat, email, VoIP phone, SNS and et. Ripplex Inc. has been distributing client software, Ripplex Address Book, for free to the world.

Ripplex Address Book has been architected so that Ripplex Inc. has no way to access to any user information except registered email address exchanged among users. Due to this unique policy and software/network architecture, users can mash up various kinds of services on Ripplex Address Book and it enables unprecedented user experiences.

About Skype

Millions of people every day use Skype software to communicate with others through free voice and video calls, as well as instant messages. Skype's 309 million registered users have made more than 100 billion minutes worth of free Skype-to-Skype calls. Many people also use SkypeOut™ or one of our global subscriptions to save money when calling landlines and mobiles at home and abroad. No longer bound to the computer, Skype conversations can also be had on a broad range of cordless handsets, mobile devices and other Skype Certified™ hardware. We've made it easy for Skype users to list and recommend their favourite local businesses to the rest of the community with SkypeFind. And even when you're fluent in Skype, there is always more to discover: hundreds of third-party developers have created software plug-ins that make Skype even more useful. All of this makes Skype the leading global internet communications company.

Skype is an eBay company (NASDAQ: EBAY), and you can learn more and get Skype at www.skype.com.

Access to a broadband Internet connection is required for Skype and all Skype Certified devices and accessories. **Skype is not a replacement for your traditional telephone service and cannot be used for emergency calling.**

Skype, SkypeIn, SkypeOut, Skype Me, Skype Certified, Skypecasts, associated logos and the "S" symbol are trademarks of Skype Limited.

About Twitter Inc.

Twitter, Inc offers a simple communication utility which asks individuals worldwide to answer one question, "What are you doing?" in 140 characters or less. Answers are exchanged instantly in real time among those who have chosen to "follow" each other's updates. Twitter is used for a variety of reasons ranging from casual socializing to urgent information exchange. As a communication utility, Twitter is unique because messages may be sent or received among groups of individuals instantly over the web, mobile texting, instant message, or downloadable applications for Mac or PC.
